Chapter 4

System Analysis

1. Chapter introduction
2. Description of the current system
3. strengths
4. Weakness
5. Feasibility study & its conclusion
6. Requirements analysis
    i. functional
    ii. non-functional requirements
    iii. Data requirements
7. System analysis
    i. [SSAD (Context diagram, DFD)/ OOSAD (Use Case diagram)]
    ii. System users/actors, inputs and outputs are clearly identified
    iii. Flow charts
8. Chapter summary

Chapter 5

System Design

1. Introduction
2. Description of the proposed systems,
3. Strengths
4. Weakness
5. Conceptual architecture of the proposed system
6. Process design using appropriate tools
    i. Context Diagram
    ii. DFD level 1 and 2
    iii. Use case diagrams
    iv. Flow charts
    v. Activity diagram
    vi. sequence diagrams etc.
7. Database Design:
    i. ERD and Data dictionary
    ii. Normalization
8. I/O of the proposed system (mock up screens)-example prototyping softwares Figma/balsamiq
    -Sample Report
    -Dashboard
    -Home Page/Landing page
    -Login/Create account
9. Chapter summary
